

Name: Fallon

Date: _____

Native American homes/shelters - Research Project (mini)

The topic of my research is the: Igloo

The most significant characteristic of the Igloo is:
what I love about igloos is, that, even though
they are made of ice and snow, they can keep
men warm.

One of the most important things I learned about the Igloo was:
Igloos are very strong. Igloos are known to be
strong because if someone pushed one of the igloo's
ice cubes, they would NOT fall down.

One of the Igloos strengths was:
when there was snow storms, the igloo would not
fall over, like a snowman would. The only reason
it would not fall over, is because someone used
strong ice.

One of the Igloos weaknesses or limitations was:
If someone made an igloo of weak ice, then
lets just say, A snowstorm came out of nowhere, so
it could get knocked down.
