Date: _____

Native American homes/shelters - Research Project (mini)

The topic of my research is the: tipi

The most significant characteristic of the tipi is:

that tipis keep warm in the winter, dry in rains and cool in the summer. Tipis were made of wooden poles and Buffalo hide.

One of the most important things I learned about the tipi was:

The tipi's size is about 15-25 feet tall and 25-30 feet wide. Tipis could hold 50 people.

One of the tipi strengths was:

it could get lifted really easy.

One of the tipi weaknesses or limitations was:

That when buffalo was extinct it was hard to find buffalo hide.
