Hello Parents,

Another four day week that felt like five days! I wasn't even there Friday (today) and I still feel like it was a full week! The weather sure took us for a roller coaster this week. From a wintry snowy weekend to highs that melted nearly everything, followed by frigid temps that just kept falling.

This week was a full week of 3D work and some great fidget spinners (<https://goo.gl/UByjgy>) created as well as great work and good effort. We worked on projects and even figured out an alternative to the original billboard project...I'll share ASAP. We also met Ms. VT and the class has already started studying for her Jeopardy game next Wednesday.

Next week we meet one more Purdue student. Ms. Christovich will join us Tuesday (barring weather issues) and then again on Thursday. She has already communicated how excited she is to meet the class. This will add to a fun week!!

Also next week we will venture into some math topics...measuring angles!! We will have fun learning about some geometry and working with protractors and other angle measuring tools. We will continue to work on and print fidget spinners. As students finish I will get them right into the printers.

I hope to finish Call of the Wild this next week. We don't go to the convocation at Purdue until Feb. 25th...but I'd like the class to have time to complete the study guides and really digest the entire story.

If all goes well and plotting on the coordinate plane continues to go well we may begin preparations for the next MinecraftEDU project. This one is a good bit different...no building. Students will use X, Y and Z coordinates to find specific locations, hidden hints and more! I make no promises that we will get started this week...but I want to make sure the students are ready!!

Have a great three day weekend!! Be safe and make sure you are ready for snow!!
