Hello Parents,

And we are now looking at six full weeks...YIKES!!! I am panicking a little about getting in the last projects and fun experiences...really I am!! I said at the beginning of the school year that I would run out of time. Now is when I look at the time left and try hard to plan well and wisely for getting the most out of the rest of the year!!

We are staying busy...but busy in the most productive way. The current projects have gone well. Aqueducts (I know that seems strange) have been a great cruise through history and just a bit of informative writing/typing. The projects created in the MinecraftEDU world are great. Albeit a few of the "aqueducts" are a little over the top...they are quite creative. Once everyone is done and pictures are done, I will try to get a good share solution...these are worth seeing!

The ring project will go across the next couple weeks. Research, writing, character development, comic drawing and writing....this will take some time! The result will be great and I look forward to get the 3D printers working in full force as the projects are completed and ready to print!

Next week we get to enjoy a great STEM lesson with Ms. VT. This will be the last of the Purdue lessons...as they are nearing the end of their time in the classroom. It doesn't seem like it's been long enough...but time slips by fast and maybe that is a sign that we are actually having fun?!

Have a GREAT three day weekend!!! See everyone back...EVERYONE back on Tuesday!!!
