Hello Parents,

Yikes...the countdown is upon us. Three and a half weeks. We've written out a calendar to try and see how to fit in the most possible. Projects, activities, experiments and more...just not enough time. 180 days is never enough.

Next week we play with physics. Rockets, motion, energy, parachutes and more will be the flavor of the week. Several demonstrations and experiments to collect data...then hands on creation of parachutes in a vertical wind tunnel. Imagine skydiving Lego guys...I'll try to get pictures.

The data collection will be a variety of video models using <https://physlets.org/tracker/>. This is a great program to show force and motion and the data easily. This can be a great time to have students think about how to set up and plan experiments.

Last we play with more data collection as an excuse to experiment with model rocket engines and centripetal forces. Pocket Lab offers a quick and easy collector for a variety of experiments. Fun stuff out in the nice weather...I hope.

**Round 4**...the final round of the great book projects are due May 18th. They are due the last Friday before school is out. I will be offering SEVERAL creative and fun options to make these last five projects attainable to ALL. This is the final Friday before the year ends. <http://mrbrantley.weebly.com/book-projects.html>

## **BOOK PROJECTS:**

**There are 5 projects due each grading period. That means 5 due by March 9th.**
