

Name:

Caleb

Date:

Native American homes/shelters - Research Project (mini)

The topic of my research is the:

teepee

The most significant characteristic of the

teepee

is:

A teepee has a hole a little off the center at the top for smoke to come out while someone is cooking.

One of the most important things I learned about the

teepee

was:

A teepee had 15ish supports that were from 12 to 24 feet long. The teepee's cover was usually made of buffalo skin.

One of the

teepee's

strengths was:

A teepee could be set up while other native american houses aren't easily movable.

One of the

teepee's

weaknesses or limitations was:

One of the teepee's limitations was that 30 to 40 people could stay in the teepee without being squished.
