

Longhouses

Iroquois Village

The topic of my research is the: Long houses

The most significant characteristic of the longhouse is it can hold up to 60 people, is two floors, and it could hold all this when it was made of wood!

One of the most important things I learned about the longhouse was they could be 200 feet long 20 feet wide and 20 feet tall (per floor= 40 feet tall).

One of the longhouses strengths was is long and sturdy during storms, bad weather, and can hold over 60 people.

One of the longhouses weaknesses or limitations was it is made of wood so it could burn easily, and they were very big so enemies could fire flaming arrows at the longhouse.
